Growing Healthy Fall Pansies and Mums

Prevention is the best strategy for avoiding crop setbacks, so this season get a jump on protecting your fall pansies and mums. By having an effective preventative pest control program in place, chemical pesticide drenches or sprays can be reduced or eliminated.

on protecting your fall pansies and mums. By having an effective preventative pest control program in place, chemical pesticide drenches or sprays can be reduced or

eliminated.

As you plant your fall crops this summer, consider using BioWorks' products to help you reduce your costs and increase your peace of mind... while saving money.

Control root and foliar diseases, and insect infestations with the complete line of products from BioWorks.
