## **BIOWORKS LAUNCHES NEW HIGHER NITROGEN VERDANTA<sup>®</sup> N-VITA<sup>®</sup> 9-4-3 FERTILIZER**

**Victor, New York** (January 19, 2016) – BioWorks launches new higher nitrogen fertilizer, Verdanta<sup>®</sup> N-Vita<sup>®</sup> 9-4-3.

N-Vita is a homogeneous, granular, compound fertilizer with a high nitrogen mix that is derived from 100% organic sources. The increased nitrogen promotes foliar growth in many crops. It is well suited for potting mixes, leafy vegetables, top dressing for fruiting vegetables, and all ornamentals.

N-Vita's organic blend is ideal for diverse applications. With its gentle release (continuous nutrient availability for up to 100 days) nutrients are gradually released by soil microbes and production of humus for better rooting and less leaching.

N-Vita also features MINIGRAN<sup>®</sup> technology. Developed by DCM Corp. of Belgium, this unique formulation process delivers user-friendly, low odor, low dust, microgranules. Each tiny granule contains uniform nutrient content for better controlled nutrient delivery.

"N-Vita will be an important tool for many of our growers," said Joe Gionta, Director of Marketing and Sales. "The higher nitrogen formula will be ideal for organic growers and other key customers as a base fertilizer or top dressing."

### **About Verdanta**

BioWorks' Verdanta liquid and granular biofertilizers have been developed to enable growers to cultivate stronger, healthier crops while being respectful of the environment. Utilizing years of

expertise and testing, these innovative products have been specially formulated to ensure ornamentals, fruits and vegetables get the precise amount of nutrition they require. All granular products feature the proprietary MINIGRAN® technology. Developed by DCM Corp. of Belgium, this unique formulation process delivers user-friendly nutrient content for better controlled delivery.

The full line of Verdanta fertilizers include:

- RM-1: High phosphorus mixture 4-30-0
- GM-2: General purpose mixture 7-6-12 + 2.3% magnesium
- K-Vita®: Organic, extra potassium mixture 2-0-20
- N-Vita®: Higher nitrogen mixture 9-4-3
- Eco-Vita®: Organic, general purpose mixture 7-5-10
- PL-2: Organic, liquid feed 2-0-6
- OFE: Chelated iron foliar spray 3-0-0 + 3% iron

### **About BioWorks**

BioWorks provides reliable, environmentally responsible, personalized solutions to growers, farmers and superintendents who manage plant/turf diseases, pests, nutrition and health.

For more than 20 years BioWorks has been helping our customers in the horticulture, agriculture and turf markets develop effective and efficient custom programs using products that are safe and proven. We are continuously reinventing the way our customers work by providing biologically-based, integrated, safe solutions and programs.

BioWorks is a founding member of the BioPesticide Industry Alliance and also a proud sponsor of the [AFE scholarship program](#), funding the 'BioWorks IPM/Sustainable Practices Scholarship'. For more information, please visit [www.bioworksinc.com](http://www.bioworksinc.com).
