1	2.50	1100	1.25	550	
2	5.00	2200	2.50	1100	
3	7.50	3300	3.75	1650	
4	10.0	4400	5.00	2200	
5	12.5	5500	6.25	2750	
6	15.0	6600	7.50	3300	

\*Curative rate applies to powdery mildew infections only.

- Start at the 1 tablespoon/gallon rate and increase by half tablespoons as needed
- MilStop concentrates represented here are based on a 100-gallon per acre spray rate. If using different spray rates, adjust the amount of water accordingly.
- Do not acidify the spray tank solution – this may decrease efficacy.
- Do not add additional surfactants or other pesticides to spray solution – this may result in phytotoxicity on sensitive crops.
