

FOR IMMEDIATE RELEASE

ON-GARD™ PLANT-DERIVED FERTILIZER NOW AVAILABLE IN CANADA

Victor, New York (April 12, 2016) – BioWorks' ON-Gard™, a plant-derived water soluble fertilizer, is now available in Canada. It can be used in greenhouses, high tunnels, nurseries and on turf and landscapes.

ON-Gard is an innovative fertilizer or nutrition complement that increases stress tolerance (heat/cold, drought, low light, salinity, pest), improves plant development and growth, and enhances nutrient uptake. Trials have also shown ON-Gard to improve Brix content.

Because ON-Gard is 100% plant-derived it is free of antibiotics, heavy metals, chlorides and other polluting agents found in animal-based amino acid fertilizers. The vegetal amino acids are derived from plant protein hydrolysate and are manufactured for consistency.

ON-Gard can be applied as a spray, root drench or dip. It improves the quality of fruits and vegetables by improving yield and reducing nitrates. It improves ornamentals with faster rooting, better foliage color and more vivid blooms.

“ON-Gard will be an important tool for many of our growers,” said Joe Gionta, Director of Marketing and Sales. “It will enhance traditional fertilizer programs, supporting all phases of development especially flowering and fruit enlargement.”

About BioWorks

BioWorks provides reliable, environmentally responsible, personalized solutions to growers, farmers and superintendents who manage plant/turf diseases, pests, nutrition and health.

For more than 20 years BioWorks has been helping our customers in the horticulture, agriculture and turf markets develop effective and efficient custom programs using products that are safe and proven. We are continuously reinventing the way our customers work by providing biologically-based, integrated, safe solutions and programs.

BioWorks is a founding member of the BioPesticide Industry Alliance and also a proud sponsor of the [AFE scholarship program](#), funding the 'BioWorks IPM/Sustainable Practices Scholarship'. For more information, please visit www.bioworksinc.com.
