If you are a professional grower and have a question, or if you just want to discuss a particular issue, **contact us.**

Our team is ready to discuss your crop-specific issues or any questions you have about our products. We will provide you with rapid, comprehensive and personalized support.

### **SAFE. PROVEN. EFFECTIVE.**

For 25 years BioWorks has been helping customers in the horticulture and specialty agriculture markets to develop effective and efficient programs using products that are safe, proven and effective.

We are continuously reinventing the way our customers work by providing biologically based, integrated, safe solutions and programs.

### **INSECT CONTROL**

Mycotrol WPO is an organic biological insecticide for the control of adult and immature stages of aphids, thrips, whiteflies and more. Mycotrol WPO even controls resistant strains such as Q-Biotype whitefly.

### **SUPERIOR FORMULATION**

Mycotrol WPO contains the highest spore concentration in a Beauveria-containing insecticide. Mycotrol is versatile enough to use as a stand alone, as a tank mix partner, or in rotation with other insecticides.

### **UNIQUE MODE OF ACTION**

The applied spores infect directly through the outside of the insect's cuticle (the skin). Spores adhering to the host will germinate and produce enzymes that attack and dissolve the cuticle, allowing it to penetrate the skin and grow into the insect's body.

## AN ORGANIC BIOLOGICAL INSECTICIDE (MYCOINSECTICIDE - WETTABLE POWDER)

### PRODUCT INFORMATION

- *Beauveria bassiana* strain GHA
- Available Sizes: 1 lb containers
- Registered for use in the USA
